

About New Metatron 4025 Hunter

What's Metatron 4025 Hunter ?

Simply saying, it is an advanced Non-Invasive Diagnostic Device for physical examination & analysis system, using the light wave resonance to scan and detect the functional status of the Human body or to trace the gradually formed abnormal conditions in the tissue, cell, chromosome, DNA helix, molecule or entire organ, then provides treatment.

Metatron 4025 Hunter Application areas:

- .Chronic-degenerative illnesses of all kinds, autoimmune diseases,adjunct therapy to tumors.
- .Weak immune system,chronic infections.
- .Acute and chronic pain and inflammations.
- .Fatigue,exhaustion,sleep disorders,depressions, migraine,psychosomatic illnesses, allergies,eczema, neurodermatitis.
- .Hormonal disturbances, menopausal difficulties, PMS
- .Old age illnesses.
- .Pediatrics: growth problems, behavioral difficulties.
- .Spinal symptoms:back pains,pains in joints, tensions, arthritis.
- .Injuries,bone fractures
- .Sports medicine, preparation for competition.

Metatron 4025 Hunter Recognizes and Treats:

- .Osteo-skeletal system(bones,joints,muscles,etc.)
- .Lymphatic system,lymph nodes individual
- .Vascular system(coronary vessels,arteries,veins,capillaries).
- .Nervous system,(brain,spinal cord,hypothalamus, pituitary)
- .Urogenital system(kidney,bladder,ovaries,uterus, prostate)
- .Respiratory system(lungs,trachea,bronchi,etc.)
- .Digestive system (stomach,intestines,esophagus,liver,etc.)
- .Endocrine system(thyroid,adrenal glands,etc.)
- .Bacteria,fungi,viruses and parasites.
- .Blood components,hormones and enzymes.
- .Allergens and environmental toxins.
- .Food ,berbs,homeopathics,pharmaceuticals etc.

The studies showed that the new Metatron 4025 Hunter is really a huge step forward in the development of the NLS Systems. Within seconds the "Metatron 4025 Hunter" finds by itself the origin of tumors and hereditary diseases. So the Metatron 4025 Hunter is beyond everything one could imagine in the past.

This overwhelming results were realized throughout the completely new 3-D Spiral-Scanning-Method. Metatron 4025 Hunter was enlarged with hundreds of new virtual pictures.

The Metatron 4025 Hunter finds by himself the DNA fragments with the most information loss. If these deviations on the DNA fragment-level are balanced, a lot of symptoms all over the body can disappear.

The Metatron 4025 Hunter to describe all-embracing is not possible, you should experience by yourself!

Together with improvement of Metatron 4025 Hunter hardware, the software is being improved also. Metatron 4025 Hunter is a new, revolutionary step in software creation. Hundreds of virtual models, starting with chromosomes, DNA and cells and up to models of organs and joints, were added to Metatron 4025 Hunter.

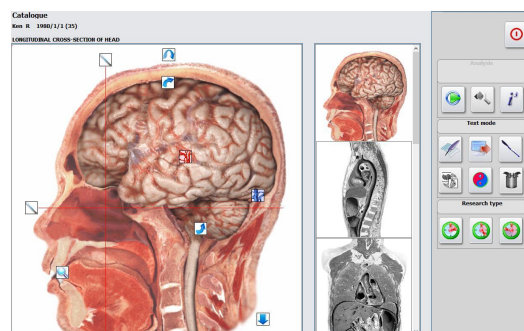

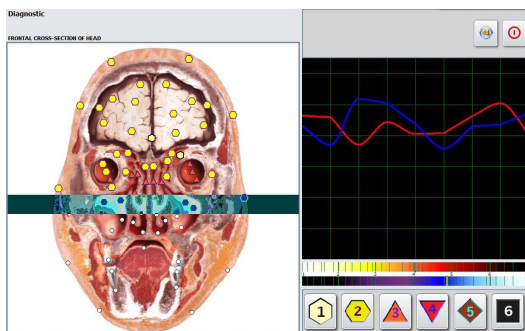

Also the algorithm of the software was renewed, thus the effectiveness and reliability of researches was increased. The most significant addition to Metatron 4025 Hunter – is a module called Metatron 4025

Hunter, which allows revealing of oncological on early stages. New user interface of the software is intuitively obvious; all symbols are visual and easy to remember.

Metatron 4025 Hunter together with new models of Metatron 4025 Hunter are considered to be a leader in non-linear diagnostics sphere, and medical certificate allows using of the system everywhere.

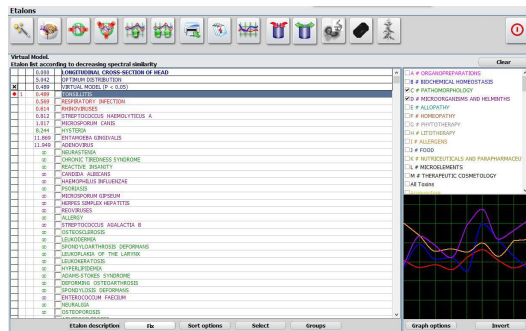

The main feature of Metatron 4025 Hunter software is function called “Three-dimensional Scanning” which allows to localize automatically a nidus where tumor appeared, heritable diseases, etc. and to find the reason of appearance at genome level, passing one after another histological cuts, cytological cuts, chromosome sets, separate chromosomes, and go deeper to fragments of DNA helix.

During a research the gross changes in tissues shown on macro cuts are revealed, and then a research of the histological cuts of the chosen tissues is carried out in a place of major pathological changes. Then, after histological cut research is done, the search of significantly changed cells is carried out in order to find changes in cell structures. This algorithm then goes to the level of chromosome set, looks for the changes in separate chromosomes, after that starts a research of DNA helix. Also user may carry out the research of multivariate topological picture and metastatic disease. It allows additional searching for metastasis in other organs. The researches are held in automatic mode and user can interrupt it in any moment.

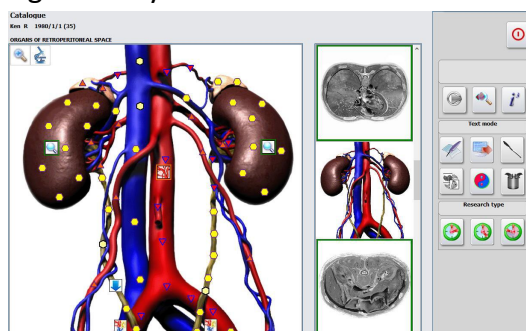

The advantages of our new system Metatron 4025 Hunter :

- adaptation of a brand new system of continuous scanning developed for high-performance multidimensional non-linear scanners (metatrons) of Z series, thus reliability of researches is increased greatly.
- Research speed is increased more than 5 times.
- The main peculiarity of Metatron 4025 Hunter is 'multidimensional virtual scanning' that allows automatically localize a nidus of tumor, hereditary diseases and reveal a reason of its appearance at genome level, by sequential passing through histological and cytological sections, chromosomes and going deeper to fragments of DNA molecule.

Introduced for the first time in 'Metatron 4025 Hunter' software:

- all peculiar to Homo Sapiens species anatomical, histological, cytological structures including ultramicroscopic ones.
- spectrums of minerals and gems, it allows to select according to individual biocompatibility a gem for permanent carrying or apply lithotherapy – healing treatment of organism by mineral radiated spectrum.
- a possibility to evaluate not only tissues of human organism, but also an ultra structure of microbial agents, viruses, helminthes, rickettsia, toxoplasms and trace on which parts of bacterial cell various antimicrobial medications influence.
- 'iridodiagnostics' and 'auricolodiagnostics' modes.
- selection of homeopathic medications with potency taken into consideration.
- introduced 'Smart-filter' function for handy and quick automatic selection of spectral processes and medications with process topology taken into account.
- Database of medical products, food supplements and homeopathic remedies significantly extended.

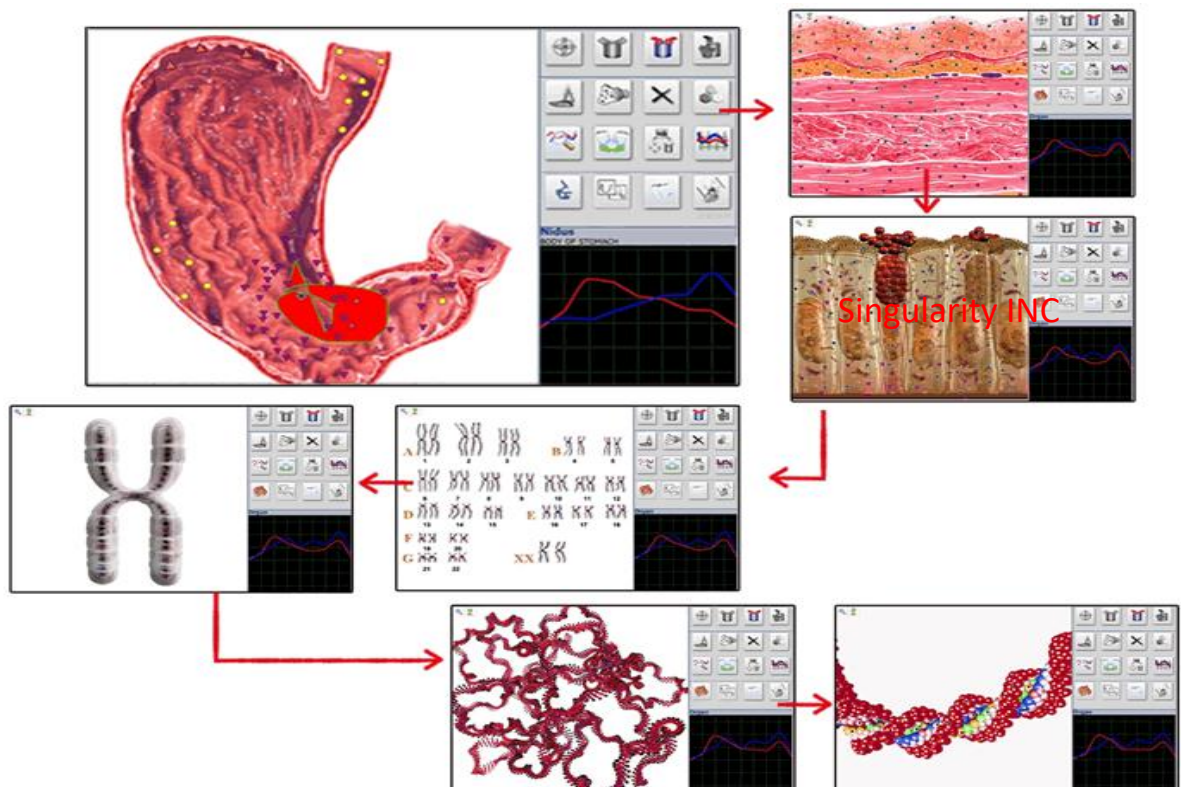

TREATMENT with Metatron 4025 Hunter:

Metatron 4025 Hunter shows in which development stage the disorder is in and if the process is acute or chronic. Furthermore with a new added function it is possible to determine how the disorder will develop in the future. This allows to discover if a therapy is suitable or if the body can solve the problem by itself.

Metatron 4025 Hunter determines not only the type of disorder but also identifies the severity of the disorders. After the measurement, the Metatron 4025 Hunter can treat the client with the function META Therapy, Phytotherapy, Stone Therapy, Acupuncture Therapy and Iris Therapy.

The treatment is carried out on eight levels: the first on the molecule, and then the ultrastructure, DNA helix, chromosome, nucleus, cell, tissue, up to the entire organ, making it the very effective and successful. The user can observe the effectiveness directly on the screen. A comparative analysis shows the changes that take place before and after treatment.

According to the same principles, Metatron 4025 Hunter is capable of measuring oscillations of remedies such as food supplements, homeopathic remedies, etc. By means of this function, it can find the most efficient remedy for the patient. Metatron 4025 Hunter can identify which therapeutic remedy works best and which burdens are present.

FEATURES:

Frequency of internal generator - 4,9GHz

Average time of scanning - 2 sec

Accuracy of researches:

Anatomical structure 85-98%

Histological models 85-90%

Genetic and chromosomal models 80-90%

Number of computer graphic models of organs and tissues - 1432

Number of digitized spectral etalons of preparations and processes - 13933

Testing of spectral etalons:

A # ORGANOPREPARATIONS

B # BIOCHEMICAL HOMEOSTASIS

C # PATHOMORPHOLOGY

D # MICROORGANISMS AND HELMINTHS

E # ALLOPATHY

F # HOMEOPATHY

G # PHYTOTHERAPY

H # LITOTHERAPY

I # ALLERGENS

J # FOOD

K # NUTRICEUTICALS AND PARAPHARMACEUTICALS

L # MICROELEMENTS

M # THERAPEUTIC COSMETOLOGY

HOW DOES IT WORK?

All the information about the state of your body is delivered to the brain. We use special trigger sensors which are shaped as headphones in order to connect to it. Furthermore, we use cutting-edge software in order to obtain this data, to decode it and to create an onscreen display in the form of three-dimensional models of organs, tissues and cells.

THE PRINCIPLE OF THE METHOD

Bio-resonance or NLS-diagnostics aim at obtaining information about the state of your health using computer and special programs. The data about an objective state of body tissues, cells, chromosomes and even hormones are being transmitted in real-time and instantly decoded in the form of specific diagnoses and recommendations.

BIORESONANCE TECHNOLOGY

Bioresonance is basically the interaction between the organisms and their frequency patterns that enclose or reverberate due to the movement of the organisms. Bioresonance technology works in collaboration with the Metatron 4025 Hunter biofeedback devices that are known as 'brain machines' or psycho-physical amplifiers.

RANGE

People who fall under any of the following categories are welcome, advised and will find benefit in using and having a Metatron 4025 Hunter device: Physicians, Naturopaths, Osteopaths, Chiropractors, Dietitians, Licensed Nutritionists, Nurse Practitioners, Registered Nurses, Physician Assistants, Integrative Medicine/CAM Program Directors, Practitioners of Traditional Chinese Medicine (TCM) and Complementary Medicine, Homeopaths, Massage Therapists, Medical SPAS, Wellness and Fitness Centers, Cosmetic Salons, Pharmacists, Medical Students and Faculty, Licensed Herbalists, Anti-aging and other Alternative Medicine Practitioners.

No doubt, Metatron 4025 Hunter will be your new corporate business model in coming future. It conveys the positive effects and the deep impression on your clients, holds their attention and makes them come back again and again to your business circle. It creates a lot of benefits and makes a lot of money from the following ways in expanding markets on preventive medical fields, medical checkup and its follow-up products or peripheral commodities for a long-term period.

Package Includes:

Aluminum case x1

Metatron Device Host x1

Bio-inductor x1

USB Power cable x1

Bio-inductor cable x1

CD x1

Dongle x1

Resonant chamber x1

Extra Bio-inductor sleeve x2
